Greyhound (and Sighthound) Medicine

This 3-part webinar series will discuss unique anatomic and clinicopathologic features of greyhounds and sighthounds, emphasizing clinically relevant issues.

March 26, 3:00 p.m. GMT
Part 1: Are Sighthounds Really Dogs?
This webinar will focus on what is different in greyhounds (and sighthounds) from other dogs.

April 30, 7:00 p.m. GMT
Part 2: Clinical Pathology in Sighthounds
This webinar will address clinicopathologic (lab work) peculiarities of the breeds.

May 28, 7:00 p.m. GMT
Part 3: Bone Cancer in Greyhounds
This webinar will focus on bone cancer (osteosarcoma), the number one cause of death in former racing greyhounds.

LEARNING OBJECTIVES
• To identify clinically relevant anatomic, imaging, and clinicopathologic features in greyhounds.
• To recognize that for most sighthound breeds, dedicated reference values should be used for laboratory tests.
• To recognize clinical signs and specific diagnostic features of osteosarcoma, and be able to formulate a diagnostic and treatment plan in affected dogs.
